Introduction to Products

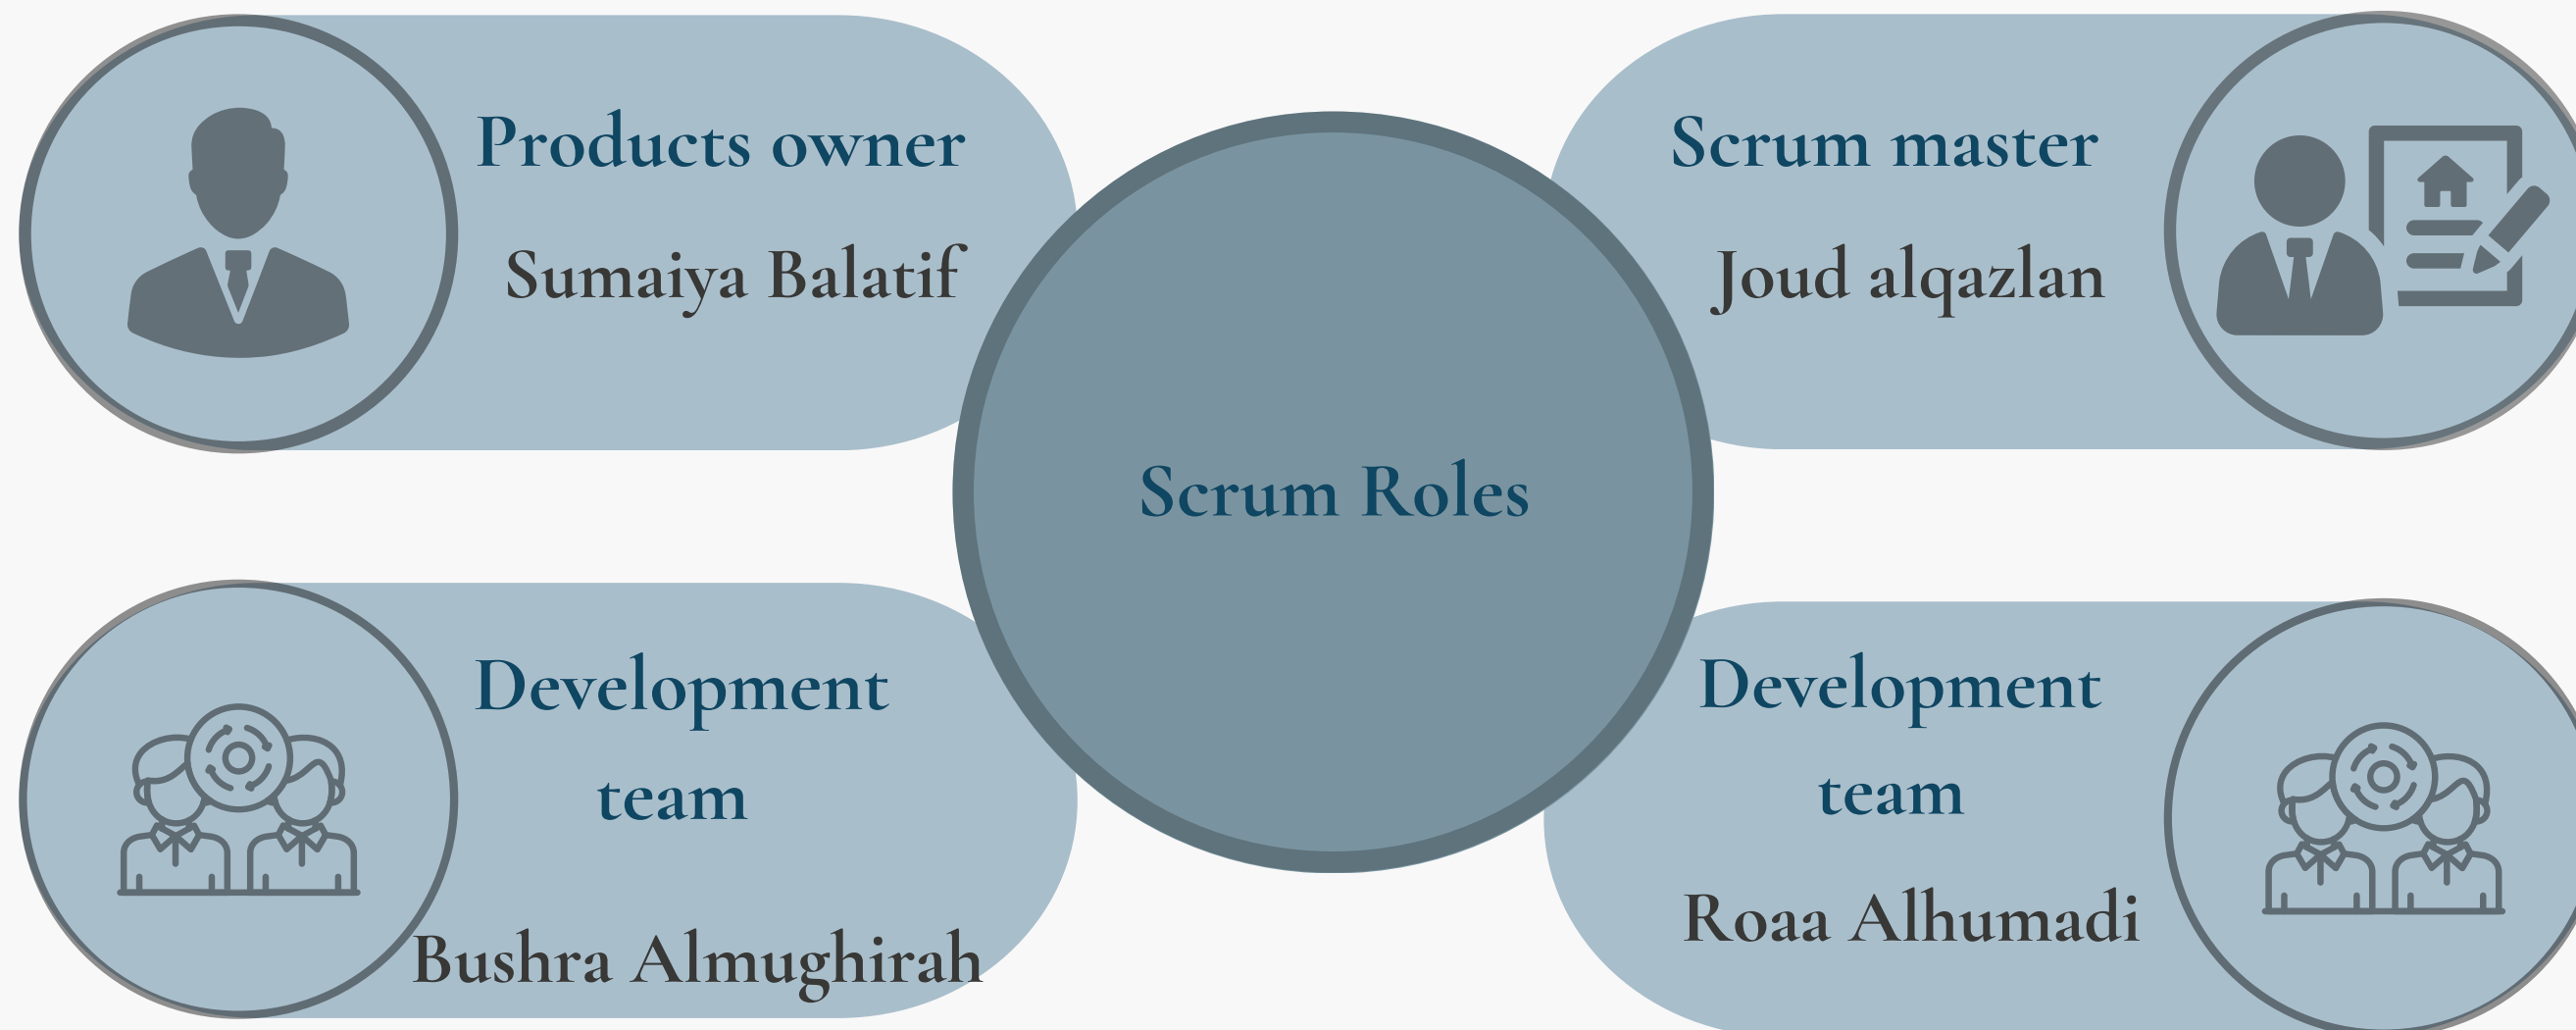

The Hospital Management System is an end to end integrated system that is aimed at enhancing hospital efficiency and patient treatment.

It stands out by integrating all hospital departments—doctors, nurses, administrators, and pharmacists—into one unified platform.

It consolidates on a daily basis the operations of the hospital from appointment scheduling, patient history, billing, prescriptions, laboratory results, and staff management into one system.

Team Members

Vision statement

For Doctor, Patient, Nurse, Administrator, Pharmacist

Who Need one single and efficient system to drive hospital operations, patient data, and communication within a hospital.

The SHMS is a comprehensive hospital management system that unifies all departments onto one platform.

That simplifies day-to-day hospital activities, reduces paperwork, improves interdepartmental coordination, and enables better patient care.

Unlike traditional paper or stand-alone systems that cause delays, data loss, and mistakes.

Our product transforms healthcare administration by providing a smart, simple, and fully integrated setting that enhances hospital efficiency, accuracy, and patient satisfaction.

Stakeholders:

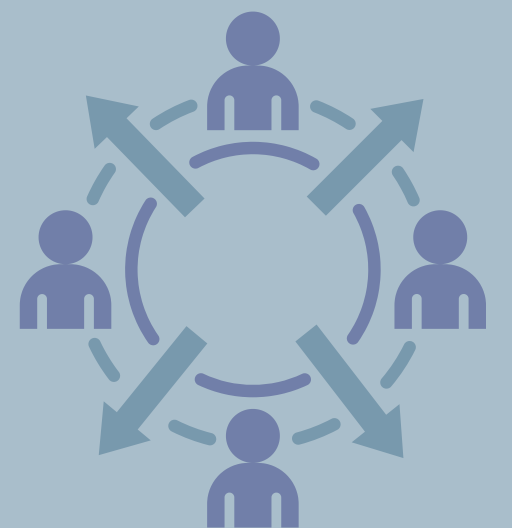

Internal :

- Hospital Administrators
- Doctors
- Nurses
- pharmacists
- Accountants
- IT Support

External :

- Patients
- Insurance Companies
- Health Authorities

Product Backlog

ID	AS A ...	I WANT TO ...	SO THAT ...	PRIORITY	Number of SPRINTs	STATUS
1	Administrator	register doctors, nurses, and staff	I can manage user access and system roles	High	1	Complete
2	Patient	register and create an account	I can book appointments and access my medical records	High	1	Complete
3	Patient	book an appointment online	so that I can choose a convenient time with my preferred doctor	High	2	Complete
4	Doctor	view my patient list and appointments	I manage my daily schedule efficiently	High	1	In Progress
5	Doctor	view a patient's full medical record before treatment	so that I can make accurate diagnoses and decisions	High	1	In Progress
6	Patient	enter my insurance information in the hospital application	So that I can check if my insurance is valid and see my coverage amount	High	1	Not Started
7	Lab Technician	upload test results to the system	doctors can access lab data without delay	High	2	Not Started
8	Nurse	update patient's vital signs and daily progress	doctors can monitor patient condition in real life	High	1	Not Started
9	Accountant	generate billing and payment reports	I can track hospital revenue and patient payments	Medium	2	Not Started
10	Doctor	request lab tests and view results digitally	I can make faster medical decisions	Medium	2	Not Started
11	Pharmacist	manage and update available medicines in the inventory	I can ensure that prescriptions are filled correctly	Medium	1	Not Started
12	Administrator	generate reports on hospital performance and staff activity	I can evaluate efficiency and improve management	Medium	2	Not Started
13	Patient	pay medical bills online securely	I can complete my payments easily from home	Medium	2	Not Started
14	Patient	view prescriptions and lab results online	I can stay informed about my health status	Medium	2	Not Started
15	Patient	receive appointment reminders via SMS or email	I won't forget my scheduled visits	Low	1	Not Started
16	Doctor	communicate with other doctors through secure messaging	I can discuss patient cases easily	Low	2	Not Started

DAILY SCRUM						
Team member	Question	Sunday	Monday	Tuesday	Wednesday	Thursday
Sumaiya	What did you you do yesterday?	-	Attend team meeting.	Wrote the first draft of product vision.	Reviewed the vision with team.	Prepares notes for next Sxrum meeting.
	What are doing today?	Sprint up plan.	Finalizing project goal.	Sharing feedback with members.	Organizing presentation points.	Summarizing weekly work.
	Is there anything blocking you?	No	No.	No.	No.	No.
Joud	What did you you do yesterday?	-	Reviewed user stories.	Created the first sprint Backlog.	Organized tasks by priority.	Updated task status.
	What are doing today?	Following up with team.	Selecting tasks for sprint.	Updaing the table.	Checking progress.	Writing summary notes.
	Is there anything blocking you?	No	No.	No.	No.	No.
Roaa	What did you you do yesterday?	-	Collected requirements from team.	Added items to Product Backlog.	Reviewed task distribution with Busra.	Updated final list.
	What are doing today?	Orgnize backlog.	Assigning task.	Tracking updates.	Reviewing team items.	Reviewing work withhteam.
	Is there anything blocking you?	No	No.	No.	No.	No.
Bushra	What did you you do yesterday?	-	Helped Roaa distribute tasks.	Checked task status.	Followed up with team progress.	Added short notes for review.
	What are doing today?	Orgnizing work.	Updating progress.	Writing documentation.	Reviewing updates with Roaa.	Preparing weekly report.
	Is there anything blocking you?	No.	No.	No.	No.	No.
